Moore County Health Department's Family Planning Program

Raising a family is a big step for anyone. Family planning is a process that lets you decide when you want to have children. Whether you are ready to have children or not, family planning can help you make choices that support your decision.

Moore County Health Department's Family Planning Program provides comprehensive family planning and preventive health services to residents of Moore County. The program is financially supported by county, state and federal funds. Fees for services are based on a sliding fee scale. Moore County Health Department has several Family Planning clinics scheduled each week; patients are seen by appointment.

The Family Planning Program provides contraceptive services, health screenings and examination, sexually transmitted disease screening and treatment, preconceptional health screening and counseling, community education, and immunizations. Some of the birth control methods offered at the Moore County Health Department include abstinence education, oral contraceptive pills, patches, Nuva Ring, intrauterine devices, implants, Depo, condoms/vaginal film, diaphragms and emergency contraception. Information regarding sterilizations and basic infertility services is also offered.

The Moore County Health Department strives to help reduce adolescent pregnancy rates among Moore County residents' ages 10-17 years old, repeat adolescent teenage pregnancies, short birth intervals between pregnancies, and unintended or unwanted pregnancies.

For more information, please call 910.947.3300, or visit the Moore County Health Department website at www.moorecountync.gov/health.
