In such an event, MCTS will inform the requesting organization of the following:

1. The request must be approved by the Director of MCTS or their designee;
2. If approved, the requested services will be added to the schedule; however, to the extent possible, the assistance will not interfere with the scheduled operations of MCTS;
3. The organization will identify its clients to be transported, the locations for transportation services to be provided, preferred pick up times, and whether an aide/escort will be accompanying any of the clients. (See Section 8, Passenger Aide/Escort).
4. All trips are limited to in-county services only. No out of county trips will be provided;

7. CANCELLATIONS

Cancellations must be received by MCTS at least 24 hours before a passengers requested appointment time to avoid a No-Show charge.

Drivers are not allowed to accept cancellation requests at any time.

8. PASSENGER AIDE / ESCORT

Passengers who need assistance getting to or from the vehicle, entering or exiting the vehicle, or moving around while inside the vehicle must have an aide accompany them. It is the responsibility of the passenger, the passengers' family or guardian, or the sponsoring agency to furnish the aide.

The aide as defined by ADA will not be charged for the trip and is to stay with the passenger. Persons with physical or mental disabilities transported to and from adult daycares must have a responsible person to take them to and from the vehicle.

9. CURB-TO-CURB SERVICE

Moore County Transportation Services provides curb-to-curb services. If additional assistance is needed the driver must remain within view of the vehicle while other passengers are on board. MCTS drivers assist passengers on and off the vehicles and to the entry door if required. Passengers who are non-ambulatory or need additional assistance beyond entry door must be accompanied by an aide or family member/guardian.

The MCTS system does not provide aides or door-to-door service.

House numbers should be readily visible from the road.

Private driveways and roads should be maintained and not present a hazard to vehicles. Failure to maintain private roads and driveways will result in MCTS vehicles declining to provide service.

All passengers must sign a Release, Waiver and Indemnification of Liability prior to receiving transportation services. (Attachment 8)

10. MOBILITY DEVICES

Passengers must supply their own mobility device. Drivers are not permitted to transfer passengers from beds, chairs, etc., into wheelchairs or other mobility devices.

With respect to passengers with wheelchairs, combination equipment, or other mobility devices (collectively referred to as "Mobility Devices") that are larger or heavier than the design standards for MCTS vehicles and equipment, MCTS must carry the passenger if the lift and vehicle can accommodate

the passenger plus the size and weight of the Mobility Device. MCTS may decline to provide transportation services to a passenger if the combined weight of the passenger and the Mobility Device exceeds that of the lift specifications or if the carriage of the Mobility Device is demonstrated to be inconsistent with safety requirements.

All Mobility Devices must be secured in the designated securement areas. MCTS may not deny transportation services to a passenger on the ground that the passenger's Mobility Device cannot be secured or restrained satisfactorily by the vehicle's securement area.

MCTS may recommend to a user of a Mobility Device to transfer to a vehicle seat. MCTS may not require the individual to transfer.

MCTS staff, where necessary or upon request, shall assist individuals with disabilities with the use of securement systems and lifts. If the assistance requires MCTS staff to leave their seats to provide assistance, they shall do so.

MCTS staff shall permit individuals with disabilities who do not use Mobility Devices, including standees, to use a vehicle's lift to enter the vehicle.

The wheelchair lift is designed for one person only and, if applicable, that person's Mobility Device. Accordingly, only one person shall occupy the wheelchair lift while it is in operation, going up or down.

The passenger's delivery destination and home destination must be wheelchair-accessible. The driver retains the option to refuse service if there are steps, steep ramps, bumpy terrain or other dangerous conditions that present a safety hazard to either the driver or passenger.

MCTS does not transport Mobility Devices without the client being present.

11. NO-SHOWS

A passenger will be considered a No-Show if MCTS arrives to pick-up the passenger and the client is not at the appointed address, refuses the scheduled trip, and/or MCTS was not notified at least 24 hours before the requested appointment time.

Contract Agencies

Contract agencies can determine that a passenger, who might otherwise be considered a No-Show, is considered a cancellation instead based on medical circumstances for the passenger and the passenger's family.

See individual agency contracts for specific No-Show charges.

ROAP

All passengers will be provided the MCTS No-Show policy in writing.

All passengers considered a No Show must pay the fully allocated cost of the scheduled trip.

First No-Show:

After the first documented No-Show the passenger and/or the passenger's sponsoring agency if applicable will receive a warning letter advising that further missed trips will result in a suspension of transportation services for a period of thirty days.

Second No-Show:

After the second documented No-Show the passenger and/or the passenger's sponsoring agency if applicable will receive a letter advising that his/her transportation services have been suspended for 30 days.

Third No-Show:

All suspensions will reset on July 1st.

It is the responsibility of the agency, or the child's parents or guardians, to provide such a child safety seat. The MCTS system does not provide child safety seats. Small children who do not have a safety seat will be refused transportation until such time as the agency or individual provides a suitable seat. When a child reaches age 8 (regardless of weight) OR 80 pounds (regardless of age), a correctly fitted seat belt may be used instead of a child safety seat. MCTS reserves the right to refuse transportation to any child who cannot be safely secured as required by North Carolina law.

Public Involvement Plan

This public involvement plan provides direction for effective public involvement in the development of Moore County Transportation Services (MCTS) plans and programs. For our customers, this public involvement plan describes opportunities for involvement in assisting the focus and priorities for transportation at MCTS. This plan will guide MCTS in its efforts to identify and accommodate the needs of transportation customers throughout Moore County. Recognizing that different situations require different techniques for reaching the public, this public involvement plan provides techniques to be applied, as appropriate, in order to achieve the goal of effective public involvement. The goal of MCTS through this plan is to provide the highest quality public involvement possible for transportation decision-making. This can only be achieved when customers are identified and brought into the planning process. To achieve this goal, major planning and program development objectives include:

1. Solicit public participation.
2. Seek broad identification and representative involvement of customers and users of offered programs.
3. Utilize effective and equitable avenues for distributing information and receiving comments.
4. Provide educational materials and design public involvement initiatives that will support and encourage effective participation.
5. Maintain and develop staff expertise in all aspects of public involvement.
6. Support and encourage continuous improvement in the methods used to meet the public need for information and involvement.

The Federal regulations related to public involvement in transportation decision-making can be found in Title 23; Section 450.212, Code of Federal Regulations. These regulations leave the methods for carrying out public involvement to the discretion of the County; however, the public involvement processes may provide:

- Early and continuous opportunities for involvement
- Timely information on transportation issues, processes and procedures
- Reasonable access to technical and policy information
- Adequate notice of involvement opportunities at key decision points
- Methods for considering and responding to public input
- A course of action for seeking out and considering the needs of traditionally underserved groups
- Periodic review and evaluation of the public involvement process

Title VI of the Civil Rights Act of 1964, together with related statutes and regulations, provide that “no person shall on the ground of race, color, and national origin be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal funds. The entire institution, whether educational, private or governmental must comply with Title VI and related Federal civil rights laws, not just the program or activity receiving federal funds.”

Public involvement techniques continue to evolve through the application of new technology, broader public knowledge of the role one can play in transportation decision-making, encouraging creative approaches, and being ever-mindful of the goals and benefits of public participation. MCTS will support and encourage continuous improvement in the methods used to meet the public need for information and involvement. MCTS will employ a variety of techniques to invite and encourage public participation in decision-making. Some of these techniques are:

Enlisting the aid of community leaders, Transportation Advisory Board, Mailing lists, Key person interviews, Public information materials, Public Hearings, Several public meeting styles, Video techniques, Internet Use, Media strategies, Telephone techniques, Public forums

Transportation Advisory Board: The Transportation Advisory Board (TAB) is a representative group of diverse stakeholders that meets regularly to discuss issues of common concern. This committee has been used for many years and can be an effective component of public involvement efforts. The TAB has the following basic features:

- Well-represented interest groups from throughout the county

- Regular meetings
- Recorded minutes
- A goal for consensus on issues
- The adoption of an important role in the process

When agencies are presenting goals and proposed programs, its members are more apt to ask for assistance, clarification of points, and follow-up on questions. The existence of the TAB demonstrates progress toward involving people in projects and programs.

Key Person Interviews: A key person interview is a one-on-one talk about a specific topic or issue with an individual recognized or designated as a community leader. A key person might be an opinion leader, a spokesperson for the community, an elected official, the head of an organization, or a representative of local media. They are helpful in rapidly getting details on the community and in understanding the priorities of residents. They also help convey community issues to decision-makers or identify stakeholders who may be involved and interested in a project or proposal.

Public Information Materials: Public information materials provide general information about public transportation, and investments that are under way or in the planning stage. A sample range of public information materials includes:

- Brochures
- Display advertisements
- Display boards
- Electronic media
- Flyers
- Legal notices
- Local government channel
- News articles
- Newsletters
- On-line home page
- Questionnaires
- Slides and overheads
- Summaries of reports

Without the input of its citizens, staff members, and other stakeholders MCTS cannot have a true understanding of community values and needs with regard to transportation services. Local businesses, community groups, and residents may know information that is more current or more detailed than what is available to transportation professionals. Effective public involvement compliments the transportation professional's technical expertise, helps to form a consensus, and lays the foundation for solid decisions.
