

ELECTRONIC RECORDING (e-Recording)

Moore County Register of Deed's office is offering e-Recording service for all Land Record documents except for Maps and UCC's. E-Recording is the process of submitting, receiving, and processing documents for recording via the Internet that have been traditionally sent to the County for recording by runner, express mail, or courier. The use of e-recording technology makes the land records submission and recording process easier, more secure, and cost effective.

At this time, the office is using the three following submitter companies with their contact information for e-Recording below:
